MORE POWER FOR YOUR INVERTER!

SF Sonic PBX 1500 Plus is designed to provide mains quality power to your inverter through long power cuts. proprietary power technology to ensure continuous bright lights even during extended power cuts. Its advanced hybrid alloy system is specially designed to withstand hot Indian summers while extra-thick grids with high surface area ensure it can keep providing optimum power even when deeply discharged. It is manufactured at Exide Industries' modern factory in Taloja near Mumbai and available factory charged for ready use.

SF Sonic PBX 1500 Plus is fitted with advance Electrolyte Level Indicator sensor that warns against low electrolyte level of battery

BUILT TOUGH

- Made of lead antimony (Pb-Sb) for positive and lead Calcium (Pb-Ca) alloy for negative plates to deliver excellent power performance even in high ambient temperatures
- Robust grid construction with PE envelope and Glassmat separators. The compressed element assembly also prevents active material from shedding
- Extra-thick grids with high surface area for heavy deep-discharge endurance in long power cuts
- Quick recharge from a state of deep discharge to withstand frequent load shedding

EASY TO USE

- Electrolyte Level Indicator sensor to warn against low electrolyte level of battery
- Proprietary SF technology for minimum water loss and reduced topping up frequency
- High charge retention and shelf life even when the battery is not in use
- Available factory charged and ready to use

Now just fit, relax and enjoy
