

SF SONICTM BATTERIES

MORE POWER PER CRANK

ZAMINDAR 1080

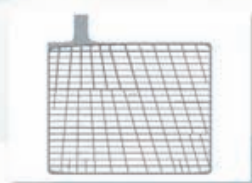

MORE POWER FOR YOUR TRACTOR!

Manufactured at Exide Industries **modern factory** at Taloja, SF Sonic Zamindar batteries are built for tough Indian rural conditions with high power output and **low maintenance** durability. The power packed cells are guaranteed to provide **more power** per crank throughout its warranty period. You can be sure of **confident starts** year after year even after a long layoff or in extreme cold conditions. All batteries feature **vibration-resistant** grid design to prevent 'shredding' on rough rural conditions and extend battery life.

THE BENEFITS

- Low Maintenance : Minimum servicing required
- High Cranking Power : For easy cold starts across years
- Vibration Resistance : For longer life on rough roads
- Sophisticated Venting : Protects from acid spills and fumes

BATTERY GRID

SF Sonic Zamindar Batteries are made of lead-antimony hybrid alloy in a special grid with lead distribution based on current density. This results high cranking power, better heat tolerance and vibration resistance.

AUTOMATED POST BONDING

The fully automated post bonding ensures deeper and more consistent bond with dimensional uniformity and lower resistance for longer life.

VENTING SYSTEM

- The venting system is designed to improve battery safety and prevent acid spills
- Leak and spill proof

THE FITMENT

- Fits all Tractor Models

BATTERY DIMENSION CHART

Ah Rating	Brand	Warranty Period (In Months)	Battery SAP Code	Battery overall dim. (L x W x H) mm
75	SF SONIC Zamindar	18 + 18	FSZ0-SZ1080-75R	305 x 173 x 225
88		18 + 18	FSZ0-SZ1080-88L	410 x 176 x 233
100		18 + 18	FSZ0-SZ1080-100L	410 x 176 x 233
